## Skill Sheet

### *Orotracheal Intubation -- AEMT*

Skill	Pass	Needs Improvement (Please comment)
1. Takes BSI precautions		
2. Places patient supine		
3. Uses appropriate basic manual and adjunct airway maneuvers; hyperventilates with 100% oxygen		
4. Assembles and checks equipment.		
5. Places head in sniffing position		
6. Has partner apply Sellick's maneuver		
7. Holds laryngoscope in the left hand; inserts it into the right side of mouth		
8. Displaces tongue to the left and brings laryngoscope midline		
9. Lifts laryngoscope forward to displace jaw without putting pressure on teeth		
10. Suctions the hypopharynx as necessary		
11. Places blade in proper position, visualizing tip of epiglottis		
12. Lifts jaw at 45° angle to the ground, exposing glottis		
13. Holds ETT in right hand and advances tube through right corner of patient's mouth		
14. Directly visualizes vocal cords, passes ETT through the glottic opening until distal cuff disappears beyond vocal cords		
15. Removes stylet, inflates distal cuff with 5–10 mL of air, attaches BVM with ETCO2 detector to connector on ETT		
16. Checks for proper tube placement; equal bilateral breath sounds, symmetrical rise and fall of chest		
17. Hyperventilates patient with 100% oxygen		
18. Secures ETT with tape or commercial device		
19. Periodically rechecks tube placement		
<b>Total Steps Passed</b>

## **Skill Sheet**

### ***Orotracheal Intubation -- AEMT***

#### **Critical Criteria (Automatic Fail)**

- \_\_\_\_\_ *Failure to initiate ventilations with 30 seconds after applying gloves or interrupts ventilations for greater than 30 seconds at any time.*
- \_\_\_\_\_ *Failure to take or verbalize BSI precautions*
- \_\_\_\_\_ *Failure to pre-oxygenate patient prior to intubation*
- \_\_\_\_\_ *Failure to successfully intubate within 3 attempts*
- \_\_\_\_\_ *Failure to disconnect syringe immediately after inflating cuff of ET tube*
- \_\_\_\_\_ *Uses teeth as a fulcrum*
- \_\_\_\_\_ *Failure to assure proper tube placement by auscultation bilaterally and over the epigastrium*
- \_\_\_\_\_ *If used, stylet extends beyond end of the tube*
- \_\_\_\_\_ *Does not secure tube*
